

PLATINUM RESIDENTIAL DESIGNER HOMES

A PICTURE OF SOPHISTICATION

MULTI-AWARD WINNER

Conceptualised, designed and constructed by Platinum Residential Designer Homes, this modern home offers elegance and opulence, complete with a magnificent centralised swimming pool.

With a simplistic cube-style exterior, this home offers impeccable finishes and exceptional natural lighting opportunities for the homeowners. This striking home utilises both natural elements and man-made finishes to illuminate the interior, create extensive airflow and showcase excellent views.

The stone clad pool cabana acts as a backdrop to the central focus of the home, providing the most intimate of environments. Meanwhile, the large alfresco area and outdoor kitchen lies on the eastern side of the home, overlooking the wide expanse of water. With a raked ceiling and terraced decking flowing all the way down to the canal, feeling totally integrated to the natural beauty Pelican Waters has to offer.

Satisfying the clients' brief, this single level home provides four luxurious bedrooms, three and a half contemporary bathrooms, a study, family and sitting room, all of which have a simple and minimalist design. The broad use of textures, exquisite finishes and privacy maximises the aspect of the home and showcases the stunning views.

A credit to the company's professionalism, this Queensland home is also extremely energy efficient in both its form and functions. With vast expanses of laminate glass throughout the home's perimeter, thermal insulation, LED downlights and a huge rainwater tank, this eco-friendly home transports homeowners to the relaxing, island life every day of the year while maintaining sustainable practises.

Platinum Residential Designer Home's design blends the 1970s aesthetic, modern accents and urban resort living to create an original tropical oasis for clients. Platinum Residential Designer Homes ensures each project embodies its ethos of luxury, light, texture, warmth and simplicity. The team of home design and construction experts make sure that clients can appreciate the fun and freedom that comes with designing the home of their dreams.

Platinum Residential Designer Homes is renowned for its resort-style, waterfront, architectural and Hampton-style homes. Based on the Sunshine Coast, the company creates fully-customised unique designs to suit each client's requirements and lifestyle.

Established in 2007 by Anthony Stopka, Platinum Residential Designer Homes designs and builds between 10 and 15 homes per year. With a strict focus on budget, innovative design and quality workmanship the company's services include designer homes, investment homes, specialist disability accommodation and industrial design and construction. The company has developed a highly regarded reputation in the Queensland building industry.

As winners of numerous Master Builders Queensland Awards – including Best Residential Kitchen and Best Display Home – Platinum Residential Designer Homes is widely recognised for delivering outstanding designs, quality and service. For a home designed and crafted to reflect your lifestyle, the team at Platinum Residential Designer Homes are highly skilled experts you can trust.
